**We are pleased to invite you to an orientation on CCBWQA after our board meeting on April 22, 2022. We plan to begin promptly after the board meeting and executive session and anticipate a 30 minute orientation.**

A large part of our orientation will walk you through the [2021 Annual Report](#). I've also shared below CCBWQA's Goals and Objectives. You can learn more about our work at [cherrycreekbasin.org](http://cherrycreekbasin.org) and [ccbwwportal.org](http://ccbwwportal.org).

We look forward to working together and are pleased to have you participate on our board of directors.

### Goals

- Use Authority's *stewardship* effectively to implement sustainable reservoir and watershed water quality management strategies.
- Implement an efficient and effective *organization* with the right expertise to achieve quality results.
- Work with Member Entities and Stakeholders to enhance *partnerships* on water quality policies and projects.
- Continue to develop leading edge, *innovative* water quality solutions, and adapt as needed.

### Objectives

- Better understand reservoir and watershed dynamics and linkages.
- Identify the right "mix" of sustainable strategies that will preserve and enhance water quality for beneficial uses and/or prevent negative water quality impacts.
- Ensure that the Authority Board maintains an adaptable organizational structure and expertise so that it can efficiently identify, prioritize, and implement Authority initiatives, and respond to requests.
- Enhance partnerships with Member Entities and Stakeholders to leverage Authority resources, resulting in improvement, protection, and/or preservation of water quality and beneficial uses, and prevention of negative water quality impacts.
- Continue to be recognized as an innovative, leading edge watershed authority.
